

Study Programmes Taught in German

The Lucerne University of Applied Sciences and Arts offers Bachelor and Master degrees in Engineering, Architecture, Economics, Social Work, Art, Design and Music.

Classes are generally held in German, except for special degree courses such as the BA Design Management, International or some individual lessons (e.g. in music). Teachers may agree to teach in a foreign language; many of them of course speak English, French, Italian or other languages. Nevertheless, to make contact with locals easier, you need a certain fluency in German (written and spoken).

Lucerne University of Applied Sciences and Arts

**HOCHSCHULE
LUZERN**

Study in Lucerne

FH Zentralschweiz

Study where others go on holiday

Lucerne University of Applied Sciences and Arts offers a wide range of interesting undergraduate and graduate courses to an international public. From summer 2008, it also features a postgraduate summer school for business participants.

Welcome to Lucerne

Lucerne, a world-famous centre of culture and tourism, is also a centre of education. Through its five schools (Engineering and Architecture, Business, Social Work, Art and Design, and Music), Lucerne University of Applied Sciences and Arts offers a broad spectrum of attractive courses. You can expect state-of-the-art infrastructure, a stimulating interdisciplinary environment and exceptional teaching staff. Over 3,000 undergraduates and more than 1,500 individuals in the professional development programmes benefit from the outstanding facilities provided on this attractive campus at the foot of Pilatus, right on the shores of Lake Lucerne.

Lucerne University of Applied Sciences and Arts is well networked with other universities and institutions both in Switzerland and abroad. The five schools – together with Teacher Training University of Central Switzerland, and University of Lucerne, both campus partners (www.campusluzern.ch) – collectively provide tertiary level courses and offer lectures and seminars combining elements from more than one school. This facilitates work across disciplinary boundaries.

Other attractive features for students include amenities like the campus crèche and the university sport facilities, which offer a range of training programs, courses and events.

Study Programmes Taught in English

Lucerne School of Business

Bachelor of Science in Business Administration International Management + Economics

The Bachelor of Science in Business Administration with International Management + Economics is a full-time six-semester course that starts in the autumn semester, with courses taught entirely in English (with the exception of non-English modules). For more information: Prof. Pius Muff, pius.muff@hslu.ch

Master of Science in Business Administration with Major in Tourism

While tourism organisations in Switzerland and abroad are growing, merging and changing ownership, new and increasingly complex projects are underway in emerging destinations such as Eastern Europe, India and China – all of which adds up to a world of opportunities for suitably qualified holders of a Master degree. Not only will graduates find exciting challenges in private companies, they will also be qualified to work in the public sector in tourism regions or to join affiliated organisations. For more information: Dr. Andreas Liebrich, andreas.liebrich@hslu.ch

Summer School

Summer School Lucerne, which is run by the Lucerne University of Applied Sciences and Arts, offers a superb international learning and networking platform to managers who want to continue their studies over the summer. For more information: www.hslu.ch/summerschool or Christoph Wydler, christoph.wydler@hslu.ch

Lucerne School of Social Work

Master of Arts in International Community Development (MAICD)

The MAICD focuses on development work that promotes social cohesion and inclusion in the process of addressing issues such as poverty, economic development, housing, health, education and urban regeneration. It offers creative responses to difference and diversity, critical examination of policy and professional practice, and participatory approaches to working with local people who seek to improve their lives, their neighbourhood and their environment. The course promotes the view that local initiatives need to be placed within a global context and provides an interprofessional learning environment to develop knowledge and skills that can be applied in different countries with a variety of communities.

The course is offered in cooperation with the University of Westminster, London (UK).

For more information: Simone Gretler Heusser, simone.gretler@hslu.ch

Lucerne School of Art and Design

Bachelor of Arts in Design Management International

This is a unique course enabling students to apply their design and organisational skills when managing design projects and in connection with strategic planning by design agencies and companies. It combines theory and practice from the disciplines of design, business and economics, engineering and communications to provide a general overview of the areas where design, technology and management converge. Furthermore, it teaches the skills required to manage the interface between these fields.

For more information: Prof. Claudia Acklin, claudia.acklin@hslu.ch
