At the HSLU, students can expect to learn, create and thrive

Lucerne offers everything Switzerland is famous for: an excellent education system, safety and a strong economy. What makes it truly special is its welcoming atmosphere where international students feel safe, supported and at home.

Our graduates leave the HSLU with skills and qualifications that are highly sought-after by international organisations and multinationals in Switzerland and abroad. Selected programmes have international accreditation (e.g., AACSB).

Our English-taught degree programmes:

- International Business Administration
- International Sustainable Tourism Management
- Hospitality Management (Top-Up)
- Energy and Environmental Systems Engineering
- Immersive Technologies
- International IT Management
- Design Management, International

Students at the HSLU have access to leading-edge facilities including top research labs, studios and excellent campus facilities. We do our best to create a comfortable learning environment so students can focus on making the most of their studies.

Application fee: CHF 250.–
Semester fees: CHF 800.–
Additional semester fees for foreign students*: CHF 500.–

Our degree programmes deliver knowledge and theory alongside imaginative, collaborative and practice-based learning.

* Foreign students whose place of residence is abroad or who have moved to Switzerland less than two years before the start of their studies (and are therefore not eligible for cantonal funding).

The Bachelor of Science in International Sustainable Tourism is a collaborative programme with UN Tourism, taught in Madrid and Lucerne, and has a different funding structure (see the QR code linking to the relevant HSLU webpage).

More information
about international
degree programmes

Surrounded by mountains and lakes, Central Switzerland is the perfect base for people who enjoy an active lifestyle. Students spend their weekends skiing down alpine slopes, hiking scenic trails or simply relaxing on the shore of Lake Lucerne. The city also delights with a vibrant cultural schedule packed with concerts, festivals and events all year round.

At the HSLU, students join a global community in which ideas are shared, cultures connect, and friendships are forged for life. Simply put, they get to experience Swiss student life at its best. The HSLU is a place where they belong and thrive.

Students benefit from a supportive learning environment with small groups and approachable lecturers. The setup encourages regular interaction and helps students stay engaged in their studies. Students are not just numbers. They are part of a community.

In that community, students grow:

- academically; thanks to high standards and practical experience
- socially; through strong connections and a shared purpose
- personally; by learning who they are and who they want to be

What our students say

"Lucerne offers a relaxed campus vibe and a strong practical focus that really helps to connect theory with real-life business. There's also a great sense of community among students: international, supportive and easy-going. And with the lake, the mountains, and a compact city centre, Lucerne is just a genuinely great place to live and study."

Linn Meyer, BSc International Business Administration

"HSLU was the only Swiss university offering Bachelor in Energy and Environmental Engineering program in English. The combination of hands-on education and mastering the English technical language was the perfect choice for me. It offers excellent career opportunities both within Switzerland and internationally!"

Olga Terekhina, BSc Energy and Environmental Systems Engineering

"Being an immersive tech student has taught me a lot of practical skills. I like what I'm learning and the course content is very interesting."

Gabriel Tetteh, BSc Immersive Technologies

"Studying in the Design Management, International programme not only equipped me with essential knowledge and a broad range of soft and hard skills, but it also shaped my strategic, systemic, and holistic thinking. This mindset allows me to approach projects with a comprehensive perspective, ensuring thoughtful consideration of all elements involved."

Stefanie Bumbacher, BSc Design Management, International
