

SPEAKER SERIES - Energy Systems Engineering Institute of Innovation and Technology Management

Konstantinos Kollias
Power Trader at Ezpada AG, Zug

Trading Aspects in Energy Markets: A Trader's Viewpoint

The significance of energy trading has grown rapidly in Europe as a result of increased energy demand as well as market integration. Virtually no country can cover its energy needs from its own sources today. Energy trading offers the possibility to ensure the needed supply of energy and protects from supply shortages and price fluctuations.

Ezpada AG is a globally active company, mainly engaged in the wholesale trading of electricity with physical delivery and financial settlement, network capacity, coal, oil, gas and emission allowances.

In his talk, Konstantinos Kollias will discuss characteristics of different energy products, fundamentals of energy market design, developments of electricity markets in European countries and best practices in electricity trading.

Wednesday, October 17, 2018
Room C403

16.45h meet and greet
17.15h presentation
18.15h open discussion
19.00h mix and mingle
