Energy consumers in Switzerland

Efforts to reduce energy consumption as targeted should start with industry, traffic and households.

Flagship projects show the way

Federal government, cantons, cities and municipalities play an exemplary role

Promote international collaboration

Establish electricity grids

Maintain electricity imports

Strengthen energy research

Reduce electricity consumption

Expand electricity supply

The Federal Council proposes eight fields of research in which the different university level institutions, universities and institutes should participate.

Lucerne University of Applied Sciences and Arts

- 430 researchers
- 770 active research projects
- 12.7 million for energy-relevant projects
