FURNACE FRIDAY!

BAKED Britain was last night warned to get ready for a record-breaking 'Furnace Friday'.

As the heatwave tightens its grip, forecasters expect temperatures of 36C (96F) today and 37C tomorrow.

The all-time high of 38.5C, which was recorded in Faversham, Kent, in 2003, could even be eclipsed.

Storms will then bring torrential rain and flooding before the heatwave resumes next week. It is set to last until the end of August in southern and eastern England.

There is nothing in the longer term to suggest a dramatic change, said Met Office forecaster Grahame Mudge last night.

As MPs issued an alert over melting motorways and 7,000 heat-related deaths a year:

- Asthma patients and the elderly were urged to stay indoors;
- One English village has reported no rainfall in 50 days;
- A primary school asked pupils to walk around their playing field five times in blistering heat to 'show solidarity with refugees'.
- London Underground's Central Line hit 40C - but passengers were told there will be no air conditioning until 2020.

Mr Mudge said record temperatures for July were expected in parts of London and the South East tomorrow and other areas could be in the high 20s to low 30s Celsius.

Thunderstorms could break out from the Home Counties all the way to the Scottish border. With

Avec la sécheresse, les rivières
trinquent

Anpassung ist unerlässlich

Die Trockenheit macht Benzin teurer

Weil der Rhein wenig Wasser führt, steigen die Benzinpreise um vier bis sechs Rappen pro Liter.

On n'a pas fini d'avoir trop chaud en Suisse romande

*Le Valais et la région lémanique sont touchés par la canicule avec
des températures très élevées par endroits allant jusqu'à 35*

Spätester Hitzetag aller Zeiten

Zum ersten Mal seit Beginn der Aufzeichnungen wurden in der Schweiz im Oktober mehr als 30 Grad gemessen.

Schlussfolgerungen

- Hitzewellen und Hitzeextreme werden mit dem Klimawandel häufiger, intensiver und länger
- Städte und Ballungszentren sind hot spots
- Klimaschutz macht einen grossen Unterschied
- Anpassung ist nötig – auch heute schon und bietet neue Chancen
